SUMMARY

Result oriented Software Engineering student and Club President with a 9.0 CGPA and a focus on SDE intern. Proven track record of leading 9-member engineering teams to architect scalable NLP-integrated platforms and high-frequency data pipelines. National Hackathon winner, runner up and finalist. Rajyapuraskar Awardee and NCC A Certificate Holder with a background in disciplined leadership, dedicated to building robust, high-availability software for global scale.

EDUCATION

SRM Institute of Science and Technology- Ramapuram, Chennai

- Bachelor of Technology in Computer Science and Engineering with 9 CGPA
- Due to graduate in **May 2028**

KRM PUBLIC SCHOOL – Perambur, Chennai

- 10th: 79%
- 12th: 75%

SKILLS

Languages

Python, C, C++, HTML, CSS, JavaScript, SQL, React JS, Dart

Data Science

Pandas, NumPy, Matplotlib, Power BI, Tableau, Data Cleaning, Transformation, EDA, Scikit-Learn, NLP, Predictive Modelling

Developer Tools

Git/GitHub, Grafana, Prometheus, Loki, Grafana Cloud, Monitoring Tools

Tools

VS Code, Jupyter Notebook, PyCharm IDE

CORE CAPABILITIES

Advanced Problem Solving

Proficient in optimizing algorithmic complexity (Time & Space) using advanced Data Structures

Product Observability

Strong foundation in System Observability; capable of implementing real-time monitoring, log aggregation, and automated alerting pipelines to ensure high system availability.

SDLC

Well-versed in Git-based workflows and Agile methodologies; experienced in leading cross-functional teams through the full software development lifecycle.

Innovation

Designing practical, tech driven approaches for real-world problems

Collaboration

Leading cross functional teams, ensuring clarity and accountability

EXPERIENCE

DATA SCIENCE TEAM LEAD INTERN- INTERNPRO

16TH June 2025- 28TH July 2025

- Led a data science team to deliver a Twitter Trend Analysis system, owning technical direction, task breakdown, and final delivery.
- Automated real-time alerts for 'Negative Sentiment Spikes,' enabling a hypothetical 2x faster response time to emerging public relations issues compared to manual monitoring
- Optimized preprocessing scripts to handle a dataset of 10,000+ real-time tweets and users, ensuring low-latency data flow for real-time sentiment visualization.
- Developed a secondary validation script to cross-reference VADER scores with 'Viral Hashtag' trends, improving sentiment categorization accuracy by 15% for sarcastic or slang-heavy datasets
- Conducted EDA and sentiment categorization that improved trend detection accuracy and streamlined reporting efficiency.

DATA SCIENCE INTERN- TARCIN ROBOTICS

1st December 2025- 28th February 2026

- Engineered a centralized monitoring and log aggregation platform using Prometheus and Loki; designed custom Grafana dashboards to visualize real-time system health for robotics backend services.
- Monitored critical hardware and software metrics including CPU/Memory utilization and service uptime to identify system bottlenecks and prevent downtime during production testing.
- Established end to end observability pipelines, bridging the gap between raw system logs and actionable metrics to ensure 99.9% availability of production backend systems.
- Gained hands-on experience with observability concepts, including metrics vs logs, dashboards, and alerting workflows

POSITION OF RESPONSIBILITY

PRESIDENT - Intellects Club

FEB 2025-PRESENT

- Selected for a direct promotion from Technical Member to President based on exceptional technical proficiency and proven leadership in cross-functional environments.
- Spearheaded the club's technical vision, moving beyond the standard curriculum to organize high-impact events on emerging technologies and production-level engineering.
- Established a collaborative framework between various club domains to streamline event management and ensure high-quality technical content delivery.
- Directed the end-to-end execution of Blind Stack Challenge, coordinating with a multi-department team (Technical, Content, Social Media and Event Management) to deliver a seamless technical experience for 150 participants.

RAJYAPURASKAR AWARDEE

Bharat Scouts and Guides

- Represented district contingent; led and coordinated community service initiatives promoting teamwork, discipline, and leadership.
- Served as Patrol Leader for 3 regional camps, overseeing the coordination, safety, and task management of a specialized unit in outdoor/field conditions.
- Successfully completed 5+ advanced residential camps, building high levels of resilience, punctuality, and the ability to operate effectively within a structured hierarchy.
- Participated in high-impact community service initiatives, including beach/temple restoration projects and public health awareness campaigns, fostering a strong foundation in social responsibility and teamwork

CADET- 'A' CERTIFICATE HOLDER

National Cadet Corps

- Successfully completed a rigorous certified training program, demonstrating exceptional resilience, punctuality, and structured coordination within a complex command hierarchy.
- Earned the 'A' Certificate following a comprehensive examination of field craft, map reading, and disciplined execution.
- Applied a high degree of systematic planning and attention to detail, essential for maintaining integrity in both physical operations and large-scale software development environments.
- Developed a "Mission-First" mindset, proving the ability to deliver high-quality results consistently under demanding schedules and strict procedural constraints.

PROJECTS

Twitter Trend Analyzer: Data Science Team Lead, InternPro (AICTE Recognized)	Data Science Team Lead at InternPro
• Led the development of an NLP-driven Twitter trend analysis pipeline, coordinating data ingestion, sentiment scoring, and visualization. • Oversaw data collection strategy and guided preprocessing decisions to improve signal quality. • Applied VADER sentiment analysis and validated outputs through EDA to ensure trends reflected real public sentiment. • Designed Power BI dashboards to present sentiment shifts and topic trends in a decision-friendly format. • Balanced technical depth and team skill levels to ensure on time, high-quality delivery.	
Freelancer Dashboard (Python, Power BI, SQL)	2 nd Prize, Cloudathon 2025
• Developed a Tkinter-based full-stack analytics tool for freelancer performance tracking. • Engineered a backend pipeline to process data and feed Power BI dashboards via CSV integration. • Designed KPI-driven visualizations to identify performance trends and bottlenecks. • Achieved Runner-up position at Cloudathon 2025.	
Employee Performance Dashboard (Power BI)	1 st Prize, UBERTECH 2024
• Designed a KPI-driven employee performance dashboard using Power BI based on a structured CSV dataset. • Cleaned and modelled data to evaluate productivity, efficiency, and performance distribution across teams. • Selected and visualized metrics to enable comparative analysis and management-level insights. • Solution awarded Winner at UberTech 2024 for clarity of insights and effective KPI design.	
Video Game Sales Analysis (Tkinter, CSV, Power BI)	3 rd Prize, Data Science Derby
• Analyzed global video game sales data to identify trends across genres, regions, and publishers. • Cleaned and modeled CSV data to support comparative and time-based analysis. • Designed Power BI dashboards to highlight market performance patterns and growth opportunities. • Secured 3rd place at Data Science Derby for insight clarity and effective visualization.	
Kingpin Logistics (HTML, CSS, JS, Flask, XGBoost, Power BI, Scikit-Learn, VADER)	Finalist, Creonix Hackathon
• Led the design and execution of an end-to-end logistics intelligence platform, coordinating frontend, backend, ML, and analytics components. • Defined system architecture and task ownership across team members to ensure parallel development under hackathon constraints. • Designed the Flask backend layer to integrate predictive models, sentiment outputs, and analytics data flows. • Guided the development of ML pipelines using XGBoost and scikit-learn for logistics risk prediction and news classification. • Oversaw news sentiment analysis workflows to classify logistics-related events as favorable or unfavorable. • Directed the creation of an interactive world map dashboard visualizing ports, airports, and manufacturing hubs. • Selected as Finalist from 450+ teams for system integration depth and practical relevance.	

ACHIEVEMENTS

- National/Institutional Wins:
 1. **Winners- Uber Tech 24 (SRM VADAPALANI, 2024):** Outperformed 25 teams to secure 1st Place for developing a high-impact employee performance system; recognized for KPI design and data logic.
 2. **Runners- Cloudathon (SRM RAMAPURAM, 2025):** Secured 2nd Place for engineering a full-stack freelancer analytics tool; implemented a robust Python backend with integrated visualization pipelines.
 3. **Finalist- Creonix (Easwari Engineering College, 2025):** Selected as a Top Finalist from 450+ competing teams for designing a comprehensive logistics intelligence platform with integrated ML risk prediction.
- Recognitions
 1. **AICTE-Backed Letter of Recommendation:** Awarded a formal Letter of Recommendation for technical excellence and team management.
 2. **Received a performance-based completion letter from Tarcin Robotics** following the successful deployment of production monitoring systems.
 3. **Special Recognition Award at KRMMUN (2023):** Selected to represent the United States in the UN Security Council (UNSC) debating complex geopolitical issues regarding International Peace and Security. Led a diplomatic block of multiple nations to draft and present a Working Paper on the systemic threats of civil-war escalation, demonstrating high level coordination and consensus-building.
